## UNIT-IV

**Analyze the given passage and answer the questions:** **5**

The sun is the primary source of energy for our planet. It provides light and heat, which are essential for life. Plants rely on sunlight to perform photosynthesis, a process that produces oxygen and food. The sun also influences the climate, helping to regulate temperatures across the world. Without the sun, Earth would be a cold and lifeless planet. In addition to supporting life, the sun has been a symbol of hope and renewal in many cultures. People around the world admire the sun for its power and energy.

i) What is the primary source of energy for our planet?
ii) What do plants rely on to perform photosynthesis?
iii) Why is the sun important for the climate?
iv) How would Earth be affected without the sun?
v) What does the sun symbolize in many cultures?
